

Monitoring Plagiarism at CDA College

PLAGIARISM

It must be stressed that the project deliverables must be the student's own work. Any attempt to copy another's work (including downloading information from the Internet) and to represent such work as being the student's own will be dealt with rigorously under the College's regulations regarding plagiarism. It is often appropriate to quote another's work or to include some material that someone else has produced (e.g. wording, diagrams, and software from the Internet, textbooks or elsewhere) but, if this occurs, you must always acknowledge this fact by giving an appropriate reference. Failure to acknowledge any inclusion of this nature will be treated as plagiarism.

C.D.A College is using the: **The Plagiarism Check Software** (<https://plagiarismcheck.org>)

PlagiarismCheck.org service was created in 2011 as an assistance tool designed for college students and teachers. Since the day it was launched, PlagiarismCheck.org has served over 77,000 users from 72 countries. So far, more than 9,300,000 works have been checked with its help!

The screenshot displays the Plagiarism Check website interface. At the top, there is a navigation bar with the Plagiarism Check logo, menu items for Solutions, Products, Integrations, Pricing, and Support, and buttons for Login and Get started. The main content area features a section titled "Plagiarism Check integration capabilities" with a sub-headline: "We offer 8 years of experience, complex algorithms, and extensive databases to help you assess texts accurately and efficiently. Integrated into educational tools and platforms, our plagiarism checker will become an organic part of your workflow." Below this, eight integration partners are shown in a grid: Moodle, Canvas, D2L BRIGHTSPACE, Schoology, Google Classroom, Blackboard, API, and Populi. A second section is titled "Assess originality with our plagiarism and AI checker" with a sub-headline: "We've developed advanced algorithms that help find the slightest similarities in texts. Our plagiarism checker analyzes every piece of writing for the following distinctive signs". This section lists four key features: "Find and compare similarity with sources" (Find exact matches with our extensive databases and real-time search), "Detect AI content with high accuracy" (99% accuracy in detecting even slightest signs of AI, marked as NEW), "Detect Substitutions" (Easily find the trickiest word substitutions), and "Detect Rearrangements" (Find rearrangements in word order and sentence structure).
