CYPRUS

a beautiful island in the northeastern basin of the Mediterranean Sea, at the crossroads of Europe, Asia and Africa. Throughout the centuries, Cyprus has been a meeting place of civilizations and cultures. Cyprus is the third largest island in the Mediterranean featuring superb mountain scenery, forests, fascinating coastlines and beaches, and a rich historical and archaeological heritage.

Cyprus enjoys a wonderful Mediterranean climate with long dry summers from mid May to mid October and abundant sunshine throughout the year. Variations in temperature and rainfall are governed by altitude and, to a lesser extent, distance from the coast. The marvelous climate of the island offers endless opportunities to nature lovers

In May 2004, Cyprus has joined the European Union and became its easternmost and southernmost outpost. In January 2008, Cyprus has joined the Economic and Monetary Union (EMU) and hence the Euro (€) is the monetary unit in use.
